

Flat Mrs. Flanders Adventure

Grades K-3

Let's go on an adventure! I am looking for some new activities so I shrunk myself down and made myself flat. Take me with you, and have some fun. Take me along as you do everyday things. Climbing trees, building Legos, reading stories, playing frisbee, and kayak on the lake are some of the things I would enjoy doing with you! Or you can surprise me with something new! Join our weekly challenges for a lot of fun! Snap some pictures on the way and send them to me (aflanders@isd741.org) I can't wait to see what adventures we go on together!

Kids Coding Class

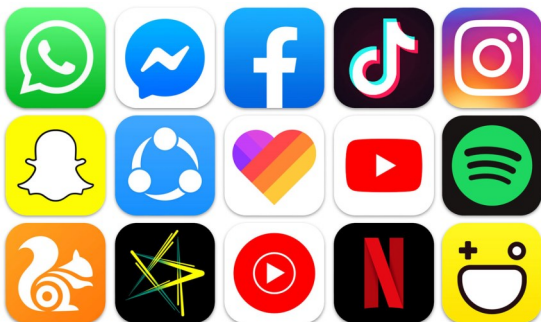

Grades 3-5

Start coding with scratch. Make your own interactive stories, animations, and create games. You will learn to think creatively, reason systematically, and work collaboratively – essential skills for everyone in today's society. You will learn how to use movement blocks, control blocks, loops, and other basic coding tools for animation with scratch.

App Exploration

Gr 6-8

Explore a new app every week! We will explore a lot of applications that you probably haven't used yet on your chromebook, laptop, or phone. We will design fun animations, stop motion videos, create logos, and videos. Use old vacation images and create something for your mom or dad, create a fun animation for your best friend, or make a video with your pet. I'm sure you'll come up with a lot of fun creations!
